

# UKATA Asbestos Awareness

Number of Delegates:	Maximum of 15
Course Duration:	½ day
Course Outcome:	UKATA accredited Certificate

### Who Should Attend?

The course is designed for personnel that undertake maintenance, refurbishment or building work and will appeal to general maintenance staff, electricians, plumbers, gas fitters, painters and decorators, joiners, plasterers, demolition workers, construction workers, roofers, heating and ventilation engineers, tele-communication engineers, burglar, fire alarm installers, architects, building surveyors and other such professionals.

### Aims & Objectives of the Course

This half day course is fully compliant with Regulation 10 of The Control Of Asbestos Regulations. It is estimated that 1.8 million people are disturbing asbestos regularly and most aren't even aware of it.

This course will make people understand what asbestos is and the typical locations where it is found and how to work safely to avoid exposure.

### Training Methods

This course is delivered through classroom-based tutorials and discussions.

### Location

On your premises or a location suitable to you.

### Certification

UKATA accredited certificate, valid for 1 year.

### Delegate Eligibility/Entry Requirements

It is important that all candidates who attend this course have a good understanding of spoken and written English.

### Additional Information

The course can be developed and adapted to refer to or include specific areas of the client's operations, particularly focussing on issues that are present and utilising the client's own asbestos policies and procedures.

For training held at your own location please ensure you make available a suitable room, which can comfortably accommodate with seating the number of delegates attending. We will also require a 240v power supply and you will be obliged to supply refreshment facilities for the delegates.

A Skills People Group Company

## COURSE PROGRAMME

**The UKATA Asbestos Awareness course covers the following:**

- What is Asbestos - the main properties of asbestos and its effects on health.
- The types and likely occurrences of asbestos and asbestos containing material in premises and plant.
- General Procedures to be followed in the event of release of asbestos.
- How to avoid the risks from asbestos.
