

Course Overview

CITB - Construction Skills Site Safety Plus Site Management Safety Training Scheme (SMSTS)

Number of Delegates:	4 - 20
Course Duration:	5 Days
Course Outcome:	Certificate

Introduction

The Site Management Safety Training Scheme (SMSTS) is designed for managers, agents and persons who have, or are about to acquire, the responsibility for planning, organising, monitoring and controlling site-based staff.

This course is endorsed by the United Kingdom Contractors Group (UKCG) as a means of proving a site manager's competence.

Aims & Objectives

The programme aims to provide delegates with the knowledge and understanding to help them manage health and safety onsite in accordance with current legal provisions and within the context of their managerial role in the building, construction and civil engineering industries. The course highlights the need for risk assessment in the workplace and supports delegates in being able to implement the necessary control measures to sustain a health and safety culture among the workforce.

Course Delivery

This five-day course is highly interactive and is delivered by means of classroom-based tutorials including case studies, exercises and individual/group presentations.

All candidates are provided with the following CITB course publications:

- GE700: Construction Site Safety manual
- XA6: Case Studies and Notes Book

Delegates will be continually assessed throughout the course through individual and group exercises. Successful delegates will pass a multiple-choice assessment at the end of the course.

Location

Courses are available at training centres nationwide. This course can also be delivered on your premises subject to minimum delegate numbers and suitability of the venue. Please contact us for information.

Delegate Eligibility/Entry Requirements

It is important that all candidates who attend the SMSTS course have a good understanding of spoken and written English.
