

Asbestos Awareness

Number of Delegates:	Maximum of 20
Course Duration:	½ Day
Course Outcome:	Certificate

Who Should Attend?

The course is designed for personnel that may come into contact with asbestos in their working role. They may include: general maintenance staff, electricians, plumbers, gas fitters, painters and decorators, joiners, plasterers, demolition workers, construction workers, roofers, heating and ventilation engineers, telecommunication engineers, burglar & fire alarm installers, architects, building surveyors and other such professionals.

Aims & Objectives of the Course

This half day course is fully compliant with Regulation 10 of The Control of Asbestos Regulations. It will also give you a better understanding of what to do if asbestos is discovered on your site. It is estimated that 1.8 million people are disturbing asbestos regularly and most aren't even aware of it. This course will explain the dangers of coming into contact with asbestos and highlight the typical location where it is found.

Training Methods

This course is delivered through classroom-based tutorials and discussions.

Assessment

Learners' knowledge will be assessed throughout the day and they will complete a multiple-choice question paper at the end.

Location

On your premises or a location suitable to you.

Certification

Construction Skills People accredited certificate.

Delegate Eligibility/Entry Requirements

It is important that all candidates who attend this course have a good understanding of spoken and written English.

Additional Information

The course can be developed and adapted to refer to or utilise the client's own asbestos policies and procedures.

For training held at your own location please ensure you make available a suitable room, which can comfortably accommodate with seating the number of delegates attending. We will also require a 240v power supply and you will be obliged to supply refreshment facilities for the delegates.
