

PASMA Low Level Access Course

Number of Delegates:	1-12
Course Duration:	½ day
Course Outcome:	Certificate

Introduction

This course is designed for any individual who works from prefabricated units under 2.5m of height. It is suitable for operatives, managers and supervisors who carry out or oversee work of this type.

Aims & Objectives

The aim of this course is to provide delegates with a thorough understanding of how to safely assemble, dismantle and relocate low level access units without risk of injury to themselves or others.

Course Delivery

This course is delivered through a combination of classroom based theory instruction and practical sessions.

Location

This course can be delivered on your premises or at a location suitable to you.

Certification

A PASMA certificate and PhotoCard, which are valid for 5 years.

Delegate Eligibility/Entry Requirements

It is important that all delegates have a good understanding of spoken and written English. Delegates must also be physically fit to undertake the practical aspects of the course.

Additional Information

Suitable head/foot protection must be worn during the practical components of the course.

COURSE PROGRAMME

The PASMA Low Level Access course covers the following:

- Legislation, regulations and guidance affecting working at height with low level access units
- PASMA Code of Practice
- PAS250
- Assembling, altering and dismantling low level access units incorporating current best practice for fall protection
- Inspection of completed low level access units
- Completion of Tower Inspection Records
- Hazards affecting the use of low level access units and how to avoid these
